## **DETAILED ACTION**

### ***Claim Objections***

1. Claim 1 is objected to because of the following informalities: fiber(3?) should read fiber. Appropriate correction is required.

### ***Claim Rejections - 35 USC § 102***

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1-5, 7-14 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Johnsgard et al, 6,200,634 B1.

Johnsgard et al teaches the claimed invention in the specification and drawings, specifically figures 5, 6A, 8 and 9.

4. Claims 1-4, 7, 8, 11, 12, and 13 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Treur et al, 6,146,343.

Treur et al teaches the claimed invention in the specification and drawings, specifically figures 3 and column 4 line 41 through column 5 line 10.

5. Claims 1-5, 7-14 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Denton et al, WO 01/50109 A2.

Denton et al teaches the claimed invention in the specification and drawings, specifically figures 4 and 6.

### ***Claim Rejections - 35 USC § 103***

6. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

7. Claim 6 is rejected under 35 U.S.C. 103(a) as being unpatentable over Johnsgard et al, US Patent 6,200,634 B1.

Johnsgard et al teaches a wafer manufacturing apparatus comprising: a susceptor 524 including a support for a wafer 502, the wafer including a topside and a bottom side; at least one sapphire optical fiber 850, 860 connected to the susceptor so that radiation from the bottom side of the wafer can 534 be monitored; and an optical signal measurer coupled to the at least one optical fiber.

Johnsgard et al differs from the present invention in that Johnsgard et al does not teach that the optical fiber is quartz.

Quartz is a well known material of construction for optical fiber. Furthermore, it has been held that: the selection of a known material based on its suitability for its intended use is prima facie obviousness (*Sinclair & Carroll Co. v. Interchemical Corp.*, 325 U.S. 327, 65 USPQ 297 (1945)); and reading a list and selecting a known compound to meet known requirements is no more ingenious than selecting the last piece to put in the last opening in a jig-saw puzzle (325 U.S. at 335, 65 USPQ at 301).

The motivation for making the optical fiber of Johnsgard et al out of quartz is to provide an alternate material of construction.

Therefore it would have been obvious to one of ordinary skill in the art at the time

the invention was made to make the optical fiber of Johnsgard et al out of quartz.
